

NUH YURDUSEVEN

Title: "Computer Engineer"

nuh_yrdsvn@outlook.com · [linkedin profile](#) · nuhyurduseven.github.io

As a career goal, I want to use my academic and work experience gains in data-related fields to provide maximum benefit to the projects of the corporate structure I am in and to take part in important projects. I want to continue my career in positions such as data science specialist, data engineer by combining my IT and academic background with my project development, teamwork, and business management skills. As someone who has adopted the principle of continuous learning, I believe that I can improve myself in data mining and software development as I gain more experience in my business life in the short term. In the long term, I want to work on high-value-added products and develop new ideas and projects to reach personal and organizational goals by being productive at work in line with productivity goals.

EXPERIENCE

FEB 2021 – ...

MACHINE LEARNING SPECIALIST, BLC-CSS

Main duty is sustaining machine learning process in different projects.

JAN 2021 – ...

FREELANCE DATA SCIENTIST, UPWORK

Data science & AI, web scrapping, writing about data science.

JUNE 2019 – JULY 2019

SUMMER INTERN, BIMEL&DEPONET

Main duty was testing, controlling, and taking care of various network or display devices as a network intern and creating network simulations on GNS3 software for learning purposes.

JUNE 2018 – JULY 2018

SUMMER INTERN, TUBITAK UZAY

Main duty was creating a tool that configure Tomcat server web archive's configuration files with big data processing group

EDUCATION

SEPT 2020 -

MSC, OSTIM TECHNICAL UNIVERSITY

Institute of Science, Software Engineering

SEPT 2017 - AUG 2021

BACHELOR, ANADOLU UNIVERSITY

Faculty of Open Education, Management information systems, GPA: 2.75/4

SEPT 2016 - JULY 2020

BACHELOR, SAKARYA UNIVERSITY

Faculty of computer & Information science, Computer engineering, GPA: 3.08/4

SKILLS

- Data science
- Data Analytics
- Data engineering
- Database management systems
- AI, ML, DL
- Python, R, SQL

PROJECTS

DATA SCIENCE FLOW CODE (*DATA SCIENCE, AI, ML, DL*)

This project is a github repository where data science & analysis and artificial intelligence studies are reviewed on some data analysis platform tools.

TIME SERIES PREDICTER (*FINANCE, PYTHON, ML, DL*)

A github repository of studies on time series prediction

TRANSACTION DB(*MSSQL*)

The database design based on bank transaction on MSSQL

IMAGE RECOMMENDER SYSTEM (*API-IMAGEAI-COSINE SIMILARITY*)

An http API designed with flask that detects objects and their numbers in images and suggests similar images.

TABU SMART (*ANDROID SPEECH API, JAVA, GAME*)

A taboo game that is coded native java and used android speech recognition API Certificates & course

Data Science Methodologies - **IBM**

Big Data Foundation -Level 2- **IBM**

MongoDB Basics- **MONGODB UNIVERSITY**

Intro to Deep Learning- **KAGGLE**

Intro to SQL- **KAGGLE**

Advance Diploma in Data Science with R- **ALISON**

Introduction to Data Science- **ALISON**

Certificate of Participation-author – **ICAENS 2021**

Elements of AI – **UNIVERSITY OF HELSINKI & REFAKTOR**

CSCON19-Data Mining – **IEEE CS**
